-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C.

112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-12, 15-16, 24 and 26-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 the only independent claim for consideration fails to link the recited elements in a meaningful manner as to result in a "system". Specifically, the ionized gas mixer and injector are not located with respect to the collection device or any other structure for that matter. The "dissolved air flotation unit" is similarly not located with respect to any other element recited in the claim. ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3, 7, 12, 15-16, 24 and 26-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moorehead (PGP 2001/0020603) in view of Hartkorn (US 3767046). Moorehead '603 provides for the mixture of influent wastewater 62 with ionized gas produced in a gas saturation device 51 and mixed with the wastewater in blender 51 and then subjected to dissolved gas flotation at separator 71. Hartkorn '046 teaches the advantageous use of preconditioning the wastewater via an electric treatment vessel (any one of vessels 1-4 operated in a batch manner). Therein, the wastewater is subjected to electrical treatment in the presence of a salt (brine) to form chlorine gas as a disinfectant [col. 9, lines 50+]. To so operate the Moorehead '603 system would have been obvious to one of ordinary skill.
